los experimentados ejecutivos de google eric schmidt y jonathan rosenberg proporcionan una guía interna de google desde su historia

empresarial y su estrategia corporativa disruptiva hasta el desarrollo de una nueva filosofía de gestión y la creación de una cultura corporativa donde prosperan la innovación y la creatividad el presidente ejecutivo y ex director ejecutivo de google eric schmidt y el ex vicepresidente sénior de productos jonathan rosenberg llegaron a google hace más de una década como ejecutivos de tecnología comprobados en ese momento la compañía ya era conocida por hacer las cosas de manera diferente reflejando los principios visionarios y frecuentemente contrarios de los fundadores larry page y sergey brin si eric y jonathan iban a tener éxito se daban cuenta de que tendrían que volver a aprender todo lo que creían saber sobre gestión y negocios hoy google es un ícono global que regularmente empuja los límites de la innovación en una variedad de campos cómo trabaja google es una introducción entretenida que pasa las páginas y contiene lecciones que eric y jonathan aprendieron mientras ayudaban a construir la empresa los autores explican cómo la tecnología ha cambiado el equilibrio de poder de las empresas a los consumidores y que la única forma de tener éxito en este panorama siempre cambiante es crear productos superiores y atraer una nueva generación de empleados multifacéticos a quienes eric y jonathan llaman creativos inteligentes cubriendo temas que incluyen la cultura corporativa la estrategia el talento la toma de decisiones la comunicación la innovación y el tratamiento de la disrupción los autores ilustran las máximas de gestión el consenso requiere disensión exiliar bribones pero luchar por las divas pensar 10x no 10 con numerosas anécdotas internas de la historia de google muchas de las cuales se comparten aquí por primera vez en una era en la que todo se acelera la mejor manera para que las empresas tengan éxito es atraer a personas creativas e inteligentes y brindarles un entorno en el que puedan prosperar a gran escala cómo trabaja google explica cómo hacer precisamente eso english description google executive chairman and ex ceo eric schmidt and former svp of products jonathan rosenberg came to google over a decade ago as proven technology executives at the time the company was already well known for doing things differently reflecting the visionary and frequently contrarian principles of founders larry page and sergey brin if eric and jonathan were going to succeed they realized they would have to relearn everything they thought they knew about management and business today google is a global icon that regularly pushes the boundaries of innovation in a variety of fields how google works is an entertaining page turning primer containing lessons that eric and jonathan learned as they helped build the company the authors explain how technology has shifted the balance of power from companies to consumers and that the only way to succeed in this ever changing landscape is to create superior products and attract a new breed of multifaceted employees whom eric and jonathan dub smart creatives covering topics including corporate culture strategy talent decision making communication innovation and dealing with disruption the authors illustrate management maxims consensus requires dissension exile knaves but fight for divas think 10x not 10 with numerous insider anecdotes from google s history many of which are shared here for the first time in an era when everything is speeding up the best way for businesses to succeed is to attract smart creative people and give them an environment where they can thrive at scale how google works explains how to do just that

this book grew out of a lot of angst well and wine put enough angst in me and i ll start ranting pour in some wine and the rants get mean and funny i still go back and read these posts now and then and i always laugh i was so mean my angst grew out of traveling different roads than most programmers those roads forced me to see the world differently now i see all sorts of patterns that many experienced programmers fail to see because well to put it bluntly they re stuck in ruts over the past 25 years i ve done a bunch of dramatically different types of programming and i ve also written far more code than any programmer ever should the long roads i ve traveled have basically given me a sixth sense i see dead people and it sucks if you re ever unlucky enough to acquire a dreadful sixth sense there are

really only two choices you can be angry and depressed about it or you can laugh about it so i try to laugh it s hard but i m getting better at it the wine helps practice helps too you need to get in the habit of laughing at yourself at others at the crazy world we live in or in time you ll just stop laughing altogether when i first started ranting i was the ugly american stomping around in my posts and essentially yelling what the hell is wrong with all you people but over the next ten years or so i like to think i ve grown into more of an amateur software anthropologist i now take cultural relativism seriously and i try hard not to judge people who think differently from me of course i don t mind poking fun at them because i don t mind people poking fun at me and ultimately i would like to convince undecided programmers to share my view of the programming world because programming works best if everyone nearby does it the same way so i ll continue to argue that my view which i ve recently taken to calling software liberalism is a perfectly valid and perhaps even preferable way to do a lot of software development converting everyone to be more liberal is doomed to fail of course but even so i hope i can still help people in radically different software cultures to understand each other better i m going to keep ranting because it appears to be the only way to make a message sink in to a very large audience some people still tell me that my blog posts are too long they tell me i could have made my point in under a hundred words i have noticed that this complaint comes most often from people who disagree with me they re really just saying they want less work to voice their disagreement but even some folks who agree with me find the posts too long to carry their attention and they complain too they re missing the point though the posts aren t too long you need a certain minimum heft to penetrate through years of trial and error i ve found that the best way to get a lot of people to listen to you is to tell them a story and you can t spin a good yarn without settling in and enjoying the ride so that s what this book is it s really a bunch of stories each might take the form of an article essay guide rant or occasionally a fiction tale but behind the structure each one of them is sharing a story even if you don t always agree i m hoping you ll at least find the stories entertaining and with luck sometimes even eye opening the guys at hyperink chose which of my posts to include by and large and they also came up with the overall chapter organization i made a couple of tweaks but what you re looking at is largely their vision of how to curate this stuff into a cohesive book i think they did an admirable job i hope you enjoy the journey as much as i did steve yegge august 2012

product management starts here before building and managing products in mid to large organisations product people need to understand the organisation s aims strategies and culture and what they mean for them

in the 1980s when computers were still early in their evolution steve jobs marketed the concept of laptops to the world he passed the torch of creativity to people like elon musk who is on a mission to create a colony for humans on mars innovators like jobs and musk rarely get support from market research in fact theyre usually slowed down by it but somehow they manage to guide themselves live in the moment and make the world a more creative place in this guidebook to finding your own inner guru youll peer into the imaginations of historys greatest inventors and entrepreneurs explore how to do the following stay abreast of advancements in technology while being rooted in human nature develop your creativity imagination and intuition to pursue original ideas maximize your potential while meeting the demands of a fast paced dynamic and performance driven lifestyle

1 wall street journal bestseller new york times bestseller usa today bestseller the team behind how google works returns with management lessons from legendary coach and business executive bill campbell whose mentoring of some of our most successful modern entrepreneurs

has helped create well over a trillion dollars in market value bill campbell played an instrumental role in the growth of several prominent companies such as google apple and intuit fostering deep relationships with silicon valley visionaries including steve jobs larry page and eric schmidt in addition this business genius mentored dozens of other important leaders on both coasts from entrepreneurs to venture capitalists to educators to football players leaving behind a legacy of growing companies successful people respect friendship and love after his death in 2016 leaders at google for over a decade eric schmidt jonathan rosenberg and alan eagle experienced firsthand how the man fondly known as coach bill built trusting relationships fostered personal growth even in those at the pinnacle of their careers inspired courage and identified and resolved simmering tensions that inevitably arise in fast moving environments to honor their mentor and inspire and teach future generations they have codified his wisdom in this essential guide based on interviews with over eighty people who knew and loved bill campbell trillion dollar coach explains the coach s principles and illustrates them with stories from the many great people and companies with which he worked the result is a blueprint for forward thinking business leaders and managers that will help them create higher performing and faster moving cultures teams and companies

from google search to self driving cars to human longevity is alphabet creating a neoteric garden of eden or bentham s panopticon will king solomon s challenge supersede the turing test for artificial intelligence can transhumanism mitigate existential threats to humankind these are some of the overarching questions in this book which explores the impact of information awareness on humanity starting from the book of genesis to the royal library of alexandria in the 3rd century bc to the modern day of google search ibm watson and wolfram alpha the book also covers search engine optimization google adwords google maps google local search and what every business leader must know about digital transformation search is curiosity and that will never be done said google s first female engineer and yahoo s sixth ceo marissa mayer the truth is out there we just need to know how to google it
