### The Importance of Vocabulary

The First Age is often referred to as the vocabulary stage because this is where players build their foundation of knowledge about the game. Understanding the basics of resource management, unit types, and building priorities sets the stage for success in later stages. It's like learning the alphabet and grammar before moving on to more complex writing and reading. This knowledge empowers you to make informed decisions and adapt to changing situations throughout the game.

### Building the Foundation: Resource Management

The core of the First Age revolves around resource management. You need to build a robust economy to fuel your civilization's growth. Here's a breakdown of essential resources and strategies:

- Food:** The backbone of your civilization. Food is used to train villagers and create your initial military force. Focus on gathering food from berries and sheep early on.
- Wood:** Used to build basic structures, including your Town Center, houses, and military buildings. Prioritize chopping down trees close to your starting location.
- Gold:** The essential currency for purchasing upgrades and advanced units. Mine gold early on and secure additional sources as your population grows.
- Stone:** Used for constructing defensive structures and upgrades, including walls and towers. While stone is less important initially, secure a source early on to prepare for future defensive needs.

### Building Priorities

Your initial build order is crucial for setting the stage for a strong First Age. A common and effective strategy involves the following steps:

- 1 Villager Rush:** Begin by quickly building a few villagers and assigning them to gather food. Aim for 34 villagers before expanding.
- 2 Town Center:** Build your primary Town Center to house your growing population and provide the infrastructure for expansion.
- 3 Houses:** Construct enough houses to accommodate your villagers. Houses provide housing for your villagers and allow your population to increase.
- 3 4 Mill:** The Mill allows you to gather food from berries more efficiently, boosting your food production early on.
- 5 Additional Villagers:** Continuously train new villagers to exploit additional resources and build your economy.
- 6 Military Building:** Consider building a Barracks or Archery Range early on to start training a small force for scouting or defense.

### Civilization Choice: Shaping Your Strategy

The civilization you choose in the First Age can dramatically impact your approach. Each civilization has unique strengths and weaknesses influencing your build order and unit composition.

**Example: The Goths**

The Goths, with their Bloodlines technology, can achieve a significantly faster villager production rate. This allows them to build a larger economy and military force early on, giving them a strong advantage in the First Age.

### Unit Composition: Building Your First Army

Your early army should focus on cheap and effective units that can defend your base and scout the

map Villagers While primarily designed for resource gathering villagers can be used as a basic defensive force early on Spearmen A solid starting unit spearmen are effective against archers and other light infantry Archers Primarily used for ranged attacks archers can harass enemy units and provide long range defense Map Awareness Understanding Your Surroundings The map plays a crucial role in your First Age strategy Scout your surroundings early on to identify Resources Locate additional sources of food wood gold and stone to secure your economy Enemy Location Gain an understanding of your opponents starting position and potential attack routes Strategic Points Identify locations for potential future expansion defensive positions or choke points Ethical Considerations in the First Age 4 Exploiting Weaknesses Its important to be aware of the potential for exploiting your opponents early mistakes or vulnerabilities This can lead to a significant advantage and potentially unfair outcomes Rush Tactics Aggressive tactics like rushing with a large army of spearmen or archers can overwhelm your opponent early on potentially creating an imbalance in the game Harassment Constantly attacking your opponents villagers or buildings can hinder their development and lead to an unfair disadvantage Conclusion Mastering the First Age of Empires is crucial for success Building a strong economy training effective units and establishing a strategic advantage are essential for surviving and thriving in this early stage Remember to focus on efficient resource management prioritize your build order and adapt to the changing dynamics of the map and your opponents actions By mastering these skills you can lay the groundwork for a dominant victory in the later stages of the game
